

iOwn.Me Terms of Service

1. Introduction

Welcome to iOwn.Me ("We," "Our," or "Us"). These terms and conditions ("Terms") govern your use of our services and interactions within our Community of Trust ("CoT"). Once you sign our End User License Agreement (EULA) and are licensed to use the Declaration Certificate ("Dec Cert") document that includes using our iOwn.Me Privacy Patent you can obtain a Declaration Certificate which is "Title" to your digital self. The next step is to use our NIL License agreement and license your NIL linked to your Dec Cert to others. It is also possible to begin storing your Dec Cert and other digital assets in our Distributed Digital Identity Vault System (ADDIV). By using our services, you agree to abide by these terms.

2. Acceptance of Terms

By accessing or using our services, including engaging with the Dec Cert, the ADDIV, NIL system, or our CoT, you agree to be bound by these Terms. If you disagree with any part, please refrain from using our platform or services.

3. Description of Services

iOwn.Me provides the "root proof of authenticity" to your digital self in the form of an iOwn.Me Declaration Certificate (Dec Cert).

iOwn.Me empowers you to take control of your digital identity through a comprehensive suite of tools. This combination fosters a novel approach to digital self-ownership, grounded in human rights principles and is self-attested as independent of or dependent on any government validation.

Here's how:

Declaration Certificate (Dec Cert): This acts as your digital "title" and establishes root proof of authenticity for your online self. It includes verification of your government-issued ID and generates a unique ID Validation number. This unique number links you to the Dec Cert and can be used to link to all your digital assets while proving ownership via the chain of custody tracking mechanisms built into the system.

Establishing Ownership: Declaration Certificate (Dec Cert) & Self-Attestation

- **End-User License Agreement (EULA):** By accepting the EULA, you agree to the terms and conditions for joining the iOwn.Me Community of Trust (CoT). This legal framework sets minimum cybersecurity and privacy standards for all members.
- After you agree to the End User License Agreement (EULA) and you are licensed to use the iOwn.Me Community of Trust IP to declare ownership of your digital self through a self-attestation process.
- This self-attestation is formalized in the Dec Cert, acting as a "title" to your data, including Name, Image, and Likeness (NIL).
- An independent ID verification step validates your government-issued ID against the information provided, ensuring you are who you claim to be.

- A unique ID Validation number is generated, linking it to the Dec Cert and your valid name. This number tracks the chain of custody for your digital ID.
- **Name, Image, and Likeness (NIL) License Agreement:** This agreement connects your Dec Cert to your existing digital assets (past social media content) and future creations.
- **Community of Trust (CoT):** This framework provides a safe and secure environment for individuals who value digital ownership. Members agree to a set of rules, including adhering to the NIL license and upholding CoT data protection standards.
- **Advanced Distributed Digital Identity Vault (ADDIV):** This secure vault stores your Dec Cert, NIL License, NFTs, and other digital assets. It allows you to track various aspects of your digital identity while adding to this over time.
- Your participation in the iOwn.Me ecosystem involves these agreements:

End User License Agreement (EULA) grants access and use of the CoT legal framework.

Name, Image, and Likeness (NIL) License Agreement connects your Dec Cert to your existing digital assets (past social media content) and future creations.

Dec Cert license allows you to utilize the Dec Cert language and is linked to the Network Privacy Patent to claim ownership in a new manner.

This combination fosters a novel approach to digital self-ownership, grounded in human rights principles and independent of government validation.

Empowering Self-Sovereignty:

iOwn.Me fosters self-attestation, meaning you declare ownership of your digital identity of an inalienable right to own your digital self. This act, combined with the Dec Cert the Patent and the CoT legal frameworks, empowers you to:

- **Own:** Establish “Title” to and, therefore, ownership over your digital assets.
- **Control:** Manage how your data is used and shared. Define Preferences and set consent mechanisms.
- **Monetize:** Explore opportunities to monetize your digital identity.
- **Manage:** Track and control your digital footprint.

Additional Considerations:

- **NFTs and Blockchain:** iOwn.Me offers optional NFT creation for specific use cases, leveraging blockchain technology for immutability.
- **Third-Party Partnerships:** Partnerships enhance your experience by providing additional services for managing your digital identity. Third parties that need to share data on a continuous basis with the CoT Owner will interconnect using the Community of Trust Interconnection Agreement or equivalent.
- **Future Services:** iOwn.Me is continuously developing new features, including enforcement services, insurance products, and data aggregation tools for personalized experiences. Interconnecting with other services or service providers that require the

transfers of data will include CoT Interconnection Agreements or equivalent. This will enable the same set of rules and agreements to go between CoTs and their partners.

- These services aim to explore monetization options for your digital identity. Interconnection agreements or equivalent will be used to define the information sharing and data that is monetized between parties to enable sharing data for monetization purposes.

A Pioneering Approach:

Overall, iOwn.Me empowers you to take control of your digital identity through a self-attested ownership claim. This innovative approach leverages a combination of legal agreements (EULA, NIL License), technology (Dec Cert, ADDIV), and community (CoT) to manage and potentially monetize your digital self in the evolving online world.

iOwn.Me is a pioneering and innovator approach that leverages a combination of:

- **Community of Trust Agreements:** These make it possible for all CoTs operating within minimum guidelines to offer and delivers servers and the CoT Interconnection Agreements are how these new rules of engagement can be spread across all services, content providers, social media or other services that agree to play by these new rules including how people monetize themselves.
- **Inalienable Rights:** These fundamental human rights are applied to the digital world.
- **Network Privacy Patent:** This unique patent strengthens the legal framework of the Declaration Certificate utilizing the Privacy Patent as licensed by signing the CoT EULA and joining the Community of Trust.
- **Self-Attestation:** You take the initiative to declare ownership through the Dec Cert. This approach allows individuals to claim ownership of their digital selves independently of external validation based on the **common sense logic** that “I Own Me in the physical world as defined by globally accepted inalienable right to be free and happy. So, I declare I own me in the digital/online world and I do not need any government or legal authority to acknowledge this digital inalienable right.”

Join the Movement:

By signing the EULA, by acquiring a Dec Cert, and utilizing the CoT and Patent and its tools, you become an innovator in this new digital ownership landscape. You are participating in a social experiment that merges established human rights with new legal logic as a cutting-edge approach that is integrated with technology to implement this new self-attested paradigm.

This is your opportunity to take control of your digital identity and build a future where you own, control, and benefit from your online presence for your defined purposes.

Important Note:

- The effectiveness of self-attestation for establishing legal ownership is a developing area.
- Future legal recognition will certainly play a role in solidifying ownership claims.
- iOwn.Me offers an innovative approach to digital identity management. It's a social experiment based on human rights principles, fostering a community around responsible data practices.

- By participating, you're taking a proactive step towards owning and controlling your digital self.

4. User Responsibilities

- **Compliance:** Users must comply with all applicable local, state, national, and international laws while using our services.
- **Account Security:** Users are responsible for protecting their account credentials.
- **Prohibited Activities:** Users must not engage in activities that interfere with the operation of our services or infringe on the rights of other users.

5. Privacy Policy

Your privacy is paramount. Our Privacy Policy, which describes how we collect, use, and safeguard your data, is integral to these terms. By agreeing to these terms, you also accept our Privacy Policy.

6. Intellectual Property

The Dec Cert system, our branding, service names, logos, and related content are proprietary properties of iOwn.Me. Unauthorized use, reproduction, or modification is strictly prohibited.

7. Content Ownership

Users retain ownership of the content they create. By posting content, users can use the new Cot Dec Cert unique ID validation number and/or an NFT HASH # to create Content Certificates. This can also be used to create an additional unique NFT Hash # of the Dec Cert linked to any digital asset to create an additional root proof of authenticity for your content. This can be applied to your digital past, which was created before your Dec Cert was created and your digital present and future. You have title to your content and own, control, and can monetize your content and data. The Community of Trust Owner may offer or bring offers to the individual members, but each member can make their own determination as stated in the iOwn.Me CoT Privacy Patent.

This **is in contrast to most existing internet social media or content service providers** that state they have a non-exclusive, royalty-free license to use, distribute, modify, and publicly display the content solely for their purposes and share with their partners and claim it is for operating and improving their services. You do not have visibility into those relationships nor those partner deals.

8. Subscription and Payment as needed

- **Subscription:** Access to certain features and services may require a subscription. Users agree to pay all applicable fees.
- **Payment:** Subscription fees are billed on a recurring basis. Users must provide valid payment information and keep it updated.

9. Termination

We reserve the right to suspend or terminate any user's access to our services if they violate these Terms or any associated policies. Such actions are at our sole discretion and can be made without prior notice.

10. Disclaimers & Limitation of Liability

Our services are provided "as is" without warranties of any kind, either express or implied. iOwn.Me will not be liable for any damages arising from the use or inability to use our services.

11. Changes to Terms

We may revise these Terms periodically. While major changes will be communicated, it remains the user's responsibility to stay updated by reviewing the most current version. Continued use post any changes signifies acceptance of those changes.

12. Governing Law

These Terms are governed by and construed under the laws of the state of Texas, USA. Users consent to the jurisdiction of Texas courts for any action arising out of these Terms.

13. Feedback and Complaints

For feedback or complaints, especially those concerning violations of these Terms, the Dec Cert system, or our CoT, please contact us directly.

14. Contact

Reach out to us for any questions, concerns, or clarifications regarding these Terms.

By engaging with iOwn.Me, you recognize that you've read, understood, and agreed to be bound by these Terms and Conditions.
