PREAMBLE

I, JESSE E. COLLARD, JR. hereby assert that my digital ex-istence—comprising all data, identifiers, creations, and representations tied to me—is solely my own. This declaration is founded on natural law, constitutional authority, and the legal protections conferred by U.S. Patent No. 10,084,757 (“Network Privacy”). My digital self is inalienable, non-waivable, and beyond the authority of any third party.

ARTICLE I—THE SELF

1. My identity—government-issued identifiers, biometric markers, behavioral traits, health data, and personal characteristics—is innately mine.
2. No entity, platform, or institution may claim ownership, control, or override my digital identity.
3. My digital Self resides at the intersection of natural rights and legal personhood.

ARTICLE II—DIGITAL SELF

1. All digital assets identifiable to me—name, image, likeness, biometrics, communications, creations, behavioral data, and online profiles—are the exclusive property of my Self.
2. These assets constitute extensions of my natural life, liberty, and pursuit of happiness, and are therefore unalienable and protected.

ARTICLE III—GOVERNANCE MECHANISM

1. I establish a governance framework under a Community of Trust™ (CoT):
 - The Administrator does not own member data; members consent to shared governance.
 - Enforcement is carried out under mutually agreed covenants.

2. This structure ensures ownership, control, and revocation rights reside with individuals, not platforms.

ARTICLE IV — PATENT PROTECTION

1. U.S. Patent No. 10,084,757 provides a legal boundary around my private information.
2. This patent:
 - Confirms my title to digital assets,
 - Empowers me with legal recognition,
 - Supports enforcement against unauthorized access or misuse.

ARTICLE V—INTELLECTUAL PROPERTY & NATURAL RIGHTS

1. My digital identity is protected under retained rights beyond enumerated law.
2. It is unalienable and immune to forfeiture via Terms of Service or digital contracts.
3. Any attempt by platforms or governments to override these rights is illegitimate.

ARTICLE VI—LEGAL ENFORCEMENT & REMEDY

1. This declaration relies on constitutional safeguards (e.g., Ninth Amendment), international conventions, and patent law.
2. I reserve full rights to enforce, defend, license, and revoke digital assets—through civil, administrative, or judicial processes.
3. Remedies for infringement or unauthorized use include injunctive relief, damages, and statutory penalties

FINAL AFFIRMATION

By signing below, I formally inaugurate my digital self-ownership. I declare autonomy, sovereignty, and full dominion over my digital presence.

I OWN ME.

Signed: JESSE E. COLLARD, JR.

Date: JULY 10, 2025
